

Answers to clarification request

RFP22-4036 – Support services for MS Dynamics Navision 2017

Date: February 24th, 2023

Question: In the Annex 5 (Financial Proposal Submission Form), what is the expectation, particularly with the regards to 'reference index and it's evolution'?

Please provide full working examples of this to aid with correct interpretation.

Price update clause

The tenderer shall detail here the proposed price discounting clause, specifying the reference index and its evolution over the last 5 years.

Insert the price update formula here.

Answer:

In addition to your financial proposal (please use the Excel price list to be completed), you can propose a price actualization clause which will be calculated according to a formula that you will justify (for example according to the expected inflation, or the inflation rate of the last 5 years).

You can also use reference indexes used in the profession for this type of clause.
